

## What's New

### Network Composer™, Version 6.0

#### Summary Descriptions

#### New Features

- **LDAP/AD Integration**
  - Network Composer will now track Web Requests, Traffic, Instant Messages by LDAP user. Composer uses a heartbeat login script executable that stays resident on the client. This is used to statefully track who is logged into the computer.
  - If LDAP integration is enabled, all the report screens have a "Hardware Profile" / "LDAP Profile" toggle switch.
  - Bandwidth control by LDAP user is also provided.
  - Instant Message logging and Web Requests can be turned on/off by LDAP profile.
- **Unknown Traffic Reports**
  - Network Composer tracks all the details of Unknown traffic that are not in the current signature set. Protocol, Source/Destination IP and Source/Destination Ports are all logged for Unknown traffic and reports are provided in the web interface.
- **Increased Custom Signature Policies**
  - Network Composer now has the ability to store over 100 custom signatures and allow administrators to create their own shaping rules based on VLAN, Destination port or range of ports and Destination IP. This gives an amazing level of control and allows administrators a huge degree of fine tuning.
  - VLAN specific signatures. Network Composer now includes enhanced VLAN recognition that allows administrators the ability to report on and even shape unique VLAN signature sets.
- **Custom MAC based Authentication page**
  - Users can now build and choose to display any HTML page in response to the MAC based authentication rule.
- **Web Filter / Anti-Spyware engine speed enhancements and stability improvements.**
  - Spanish language set is now used in the Content Analysis engine.
- **New look for Real-Time Monitor**
- **Dashboard and System Overview speed has been dramatically increased**

The Network Composer Version 6.0.1 release upgrade is now available for download — Please see the last section of the READ ME Document for details on how to upgrade your firmware or contact your Authorized Cymphonix Reseller or Cymphonix for details.
