

Network Composer™ DC30 Data Sheet

The Network Composer DC30 delivers enterprise-class WAN data stream management for small business organizations. Its all-in-one approach solves the problems created when users, applications and threats battle for network resources. By correlating critical security and application performance functions, the Network Composer DC30 delivers secure, consistent data flow, and reduces the complexity and cost of managing WAN connectivity.

The Network Composer combines a unique set of features to provide robust visibility and control over a organizations internet connection.

- **Bandwidth Management**
- **Application & User bandwidth management**
- **Content Filtering**
- **Spyware & Virus Protection**
- **IM Control and Logging**
- **Comprehensive Reporting**

Model	DC30
Capacity	
Web Requests	180,000/hour – 5 Mbps HTTP requests
Maximum IP Hosts	5,000
Maximum IP Flows	250,000
Application Identification Signatures	575
Maximum Signature Shapers	256
Client Requirements	
Browser	IE 6.0 or higher
Interfaces	
Network Interface	10/100 RJ45 - 2 ports
Console Ports	Male DB-9 RS232 - 1; RJ45 10/100 – 1
Additional Information	
Device Management	DB-9 Console Port; HyperTerminal /RJ45 Console Port; Web GUI, SSH/Telnet
Height	1U
Power Supply	100 to 240 VAC, Autosensing
